I am an enthusiastic and self-motivated front-end developer and graphic designer. I'm passionate about learning new skills or undertaking new challenges to improve my current skill set. I can work independently or within a team setting in busy environments.

Technical Skills

Development skills: HTML, CSS, SASS, JavaScript, TypeScript, Tailwind, Bootstrap, React, Next.js, Node JS, Express, Mongo DB, SQL, GIT, NPM, JEST, React Native, Python, Kotlin, Android Studio.

Design skills: Photoshop, Illustrator, InDesign, Premiere Pro, Affinity Designer/Photo, Canvas, Gimp, Figma.

Work Experience

Veri - Software for Digital Training Programme Management

Multimedia Specialist, Marketing Team (Sept 2019 - Dec 2019)

- I was tasked to design daily social media posts to advertise the products of Veri using Canva and iMovie.
- I designed their web page to select an application from Veri's website using HTML and CSS.
- I performed user experience tests on different builds of the applications and developed video guides on how to use the applications with iMovie.
- The marketing team and I analysed the best methods that attract traffic to the website and services of Veri.

Millennium Court Community After Schools Service

Website developer (Jan 2016 - March 2016)

- I developed a website for the after-school services to help them become more discoverable within the area using HTML, CSS and JavaScript.
- I created media for advertising their services with Photoshop.

Waterford Institute of Technology (2016 – 2019)

Pass with Merit, Grade 1

QQI Level 5 Multimedia

Waterford College of Further Education (2015 – 2016)

Distinction

Interests

Programming: I enjoy developing small projects where I can acquire new methods and skills to help me become a more professional developer. When I come to a difficult section it helps me to improve my problem-solving skills and allows me to think outside the box.

Baking/Cooking: I take pleasure in finding new recipes to make and challenge myself to improve on each meal I serve up. When baking I love to add new ingredients to the recipes and to redesign it to people's requests.

Drawing: I find drawing is relaxing and helps when I am struggling with creative block, I research concepts I wouldn't usually do and try out experiments to look at it from a different perspective.
