I am an enthusiastic, self-motivated and hardworking front-end developer and graphic designer. I'm passionate to learn new skills or to undertake new challenges to improve my current skill set. I am able to work independently or within a team setting in busy environments.

## Technical Skills

**Development skills:** HTML, CSS, SASS, JavaScript, TypeScript, Tailwind, Bootstrap, React, Node JS, Express, Mongo DB, GIT, NPM, JEST, React Native, Python, Kotlin, Android Studio.

**Design skills:** Photoshop, Illustrator, InDesign, Premiere Pro, Affinity Designer/Photo, Canvas, Gimp, Figma.

## Work Experience

### **Veri - Software for Digital Training Programme Management**

Multimedia Specialist, Marketing Team.

Sept 2019 - Dec 2019

- I was tasked to create daily social media post to advertise the products of Veri using Canva and iMovie.
- I designed their web page to select an application from Veri's website using HTML and CSS.
- Performed user experience tests on different builds of the applications / developed video guides on how to use the applications with iMovie.
- Worked with the marketing team analysing the best methods that attract traffic to the website and services by different method of advertisement of the products.

## **Millennium Court Community After Schools Service**

Website developer.

Jan 2016 - March 2016

- Build a website for the after-school services using HTML, CSS and JavaScript.
- Created media for advertising their services with Photoshop.

## **Education**

### **Bachelor of Science (Honours) Creative Computing**

Waterford Institute of Technology

2019 - 2020

1st Class Honours

### **Bachelor of Science Multimedia Applications Development**

Waterford Institute of Technology

2016 - 2019

Pass with Merit, Grade 1

### **QQI Level 5 Multimedia**

Waterford College of Further Education

2015 - 2016

Distinction

## **Interests**

**Programming:** I enjoy developing small projects and constantly come up with new project ideas to create or ways to improve existing projects. I love to look up and research other developer's styles of coding to help mould my skills.

**Language Learning:** A lot of media and games I consume are from Japan so I set out a task to learn Japanese. It isn't a main hobby but when I have a bit of time on the side, I enjoy studying some kanji.

**Gaming:** Playing video games allows me to relax and clear my mind or if I want a challenge, I can improve my problem-solving skills and think outside the box playing a difficult game.

**Drawing:** When I am struggling with creative block, I find drawing helps to get my creative juices flowing.
